#### BALDNESS.

A BEAUTIFUL head of Hair is the grandest ornament belonging to the human frame. How strangely the loss of it changes the countenance, and prematurely brings on the appearance of old age, which causes many to ecoil at being uncovered, and sometimes even shun society to avoid the jests and sneers of their acquaintance; the remainder of their lives is cons quently spent in retirement. In short, not even the loss of property fills the generous thinking youth with that heavy sinkng gloom as does the loss of his hair. To vert all these unpleasant circumstances, OL DRIGE'S BALM OF COLUMBIA stops the hair from falling off on the first application, and a few bottles restores it again. It likewise produces eyebrows and whiskers ; prevents the hair from turning grav, makes it curl beau-tifully, and frees it from scurf. Numerous certificates of the first respectability in support of the virtues of Oldrige's Balm are shown by the proprietors.

ROBERT WHARTON, Esq., late Mayor of Philadelphia, has certified, as may be seen below, to the high character of the following

#### MISCELLANEOUS.

THE CUNNING LUNATIC.

In many cases lunatics are exceedingly cur ning, and display a remarkable readiness of resource in unexpected emergencies. I could of manner, that such is the fact; and then he mention many instances of this, but will conwill desire you to take me into the asylum. tent myself with one. There was lately, and I am not sore whether there be not now, in one of our asylume, a lunatic, who on the loss of his reason, in the first instance—for he was repeatedly cured, though he always relapsed again—lived in an neighboring county. Belonging as he did to a family of wealth and respectability, he was provided with a keeper as soon as the first symptoms of the disease appeared. It was hoped that the unfortunate man's lunacy would be of temporary duration; and that by committing him to the care of a keeper, his friends would be spared the pains of sending him to an asylum. His insanity, however, lasted much longer than his friends had fondly hoped it would; and it was therefore eventually determined to send him to an institution for the reception of persons laboring under mental aberration, in the hope that through the superior treatment he would there receive, an additional chance of recovery might be afforded him. On the day previous to that appointed for his being sent to the asylum, he overheard his brother giving instuc-tions to his keeper on the subject. He took drive that day, he expressed himself as quite delighted with the idea, and displayed a wil-lingness to take an airing, which strongly contracted with the reluctance he had before shown to leave the house. After breakfast the gig was ready, and both started for the coun-ty town—about twelve miles distant—in the suburbs of which the asylum was situated. The lunatic was unusually cheerful and decile all the way.—And here I should remark, that his manner was sometimes so collected and ra-

tional, that it would have been difficult to con vince a stranger, that his intellects were in the Slightest degree affected.

On reaching the principal hotel, both parties came out of the gig with a view to get some refreshment, and to enable the keeper to make some necessary preliminary arrangements for the reception of his charge into the asylum.-The former, after being sometime in the house, quitted the apartment into which they were shown, for a few seconds, not deeming it ne-cessary either to take the lunatic with him or to turn the key of the door. The latter, watching the opportunity, agreeably to a pre-vious determination to that effect, stole out of the house the moment the other had quitted the apartment. The keeper miseing the lunatic on his return, an alarm was give less than five minutes, at least a dozen persons were engaged in active search for the unfortunate man, the suddenness of whose disappearance was quite unaccountable to his k No trace of him was to be found for two hours and the impression began to become general among all acquainted with the circumstance. that he had by some means or other destroyed himself. Just as all hopes of ever seeing him alive again were on the eve of expiration, the lunatic appeared, to the infinite astonishment and joy of the person entrusted with his safe keeping. But where he had been during his absence was a point which, notwithstanding all the efforts that were made with that view, could not be elicited from him. Where does the reader suppose he was, or in what way employed? That was a piece of information which his keeper learned to his cost a few hours after the lunatic's return. The latter had been to the asylum for which his friends had destined himself, and having procured access to the proper party, gave his keeper's name as his own, and represented him as being Mr. So-and-so, the brother of Mr. —.

As it was not only well known at the asylum that the latter gentleman had a brother, who was at the time laboring under insanity, but so, on the previous day, notice had been sent to the asylum, the remainder of his story was the more readily believed. 'Now,' says he, admore readily believed. 'Now,' says he, ad-dressing himself to the manager of the institu-tion, 'the lunatic is remarkably clever, singu-larly cursion.

The other was so confounded by the unexected observation that he was unable, for me seconds, to utter a word.

'Very good,' said the superintendent of the nstitution; 'we'll take care of him,' at the ame time laying hold of the astonished keeper of the lunatic, by the breast of the coat. "Sir-Sir-Sir!" stampered the confounded man ; 'labor under a mistake; that,' pointing to the lunatic, is the person to be committed o your care. I-I-I brought him here.'
'No doubt of it,' said the overseer, still drag-

ging the hapless weight forward, assisted by another servant of the establishment, to the part of the asylum for which he was intended. Gracious Heaven, Sir! what is the mean ing of this? exclaimed the luckless party, half suffocated with astonishment and indignation,

and struggling hard to disengage himself from the grasp of the parties.

'Come away, my good man, quietly with

tual party.

'I knew it all; I told you how it would be said the latter, in a steady voice, and with the

greatest self possession.
'This way,' said the superintendent, carelessly, still dragging the unfortunate party forward.

Never mind the poor fellow: I told you how he would conduct himself, and what he would say,' observed the lunatic.

A few pulls more, and the astonished and

enraged party was actually dragged into his destined apartment. When both the Superntendent and the inferior servant let go their hold, I leave the reader to fancy what were the feelings of the poor wight. \*Quite safe now: he's in our custody now! and you are refleved from all futher responsi-

So I understood, said the lunatic in a mat-ter-of-course sort of style; and with that, he quitted the place and springing into the gig which had remained at the gate all this time, drove away home again, as if he had been the most sane man in his majesty's dominions. It is impossible to describe the mingled sur-prise and constantation with which his relatives

and friends were seized on his return home.— Their first apprehension, on missing his keeper was, that he had murdered him on the way; was, that he had mutdered him on the way, and their fears were only partially calmed by his assuring them in answer to their inquiries as to what had become of his companion, that when they both proceeded to the asylum, the parties having charge of the institution insisted that he was the hundre, and took him under their care accordingly. An express was sent off to the asylon, to enquire whother the parties had been their at all, when the messenger found, to his unuterable supprise, that the facts were as the lunatic represented; and as the

'In what way is it?

'Why, he has the notion that every one else is mad but himself.'

'Oh! that is quite a common impression among persons in his state.'

'Yes; but singularly enough, his notion is, that I am the insane party, and he is my keeper. You may rely upon it, that the very moment we arrive, he will affirm in the most positive terms, and with the utmost earnestness of manner, that such is the fact; and then he dealed me a thief and a liar and a scumford, and every ting ghust wat I was. drel, and every ting ghust wat I was.

'I thought it right to inform you of the fact.' said the lunatic, 'in order that you might not be taken by surprise.'

'Oh! there was not the slightest danger of that. We are too well accustomed to such things, to be deceived either by their uffirmations or representations.'

A CHILD'S AFERCTION FOR A KrTEN.—Under our obituary head is recorded the death by drowning of a young child of Mr. Alexander Rice, residing at Squam. The circumstances under which this almost infinit (being only four years of age) lost its life, are both singular and effecting. She had followed a small bey to the river, weeping bitterly because he was about to drown a kitten for which she had formed a strong attachment, and no tions or representations.' she had formed a strong attachment, and no sooner was it tossed into the water, than the tions or representations.'

The tear will gate of the institution: it was opened and both come, to think there was none near to rescue the little sufferer who so fearlessly periled and paritively valuess one, but upon which she had set her young affections!

BADEN CORN .- A noble specimen of the Baden variety, may be seen in front of Mr Hough-ton's Seed Store. We understand the field from which it was taken will average five ears to the stalk, and the stalks twelve to fourteen feet in height. The seed was furnished from Washington by Mr. Loyd, and the specimen was taken from the field of Sheriff Handerson, who has about anacre equal to it. The ears are large and well filled. Farmers would consult their interest by procuring seed for an experi-ment, at least.—Clev. Her.
